

APPLICATION :

EnduroShield can be applied by professionally trained certified applicators. The 'once only' application comes complete with a 10 year warranty on new glass surfaces and a 3 year warranty on existing glass and stainless steel surfaces when professionally applied.

Suitable for new
or old surfaces

RESTORE AND PROTECT

EnduroShield professional applicators can not only protect your glass and stainless steel surfaces, making them up to 90% easier to clean; they can also restore them back to their original lustre. Once restored, the as-new surfaces can then be treated with EnduroShield to protect them from the harsh environment and reduce ongoing cleaning time and maintenance.

**Enduro
Shield**

Enduro Shield

*It's like
water off a
duck's back*

EnduroShield is a revolutionary professionally applied invisible coating that protects glass and stainless steel against staining and etching caused by the corrosive effects of salt water

- ✓ **Makes cleaning a breeze**
 - An occasional wipe down is all it takes, no more scrubbing
- ✓ **'Once only' application**
 - Keeps surfaces looking brand new
- ✓ **Improves visibility**
 - Causes water to form beads, providing greater visibility
- ✓ **Superior protection**
 - Protection against salt corrosion, staining & etching on marine glass surface
- ✓ **Reduces cleaning time**
 - By up to 90%
- ✓ **10 year warranty**
 - On new glass
- ✓ **3 year warranty**
 - On existing glass and professionally applied stainless steel
- ✓ **UV Stable**

Enduro Shield

UP TO **90% LESS CLEANING**

**PERMANENT PROTECTIVE COATINGS
MARINE GLASS : STAINLESS STEEL**

MARINE PROTECTION:

Cleaning boat surfaces is an ongoing and time demanding task. Maintenance can prove difficult due to the constant exposure to sea salt and contaminants.

Microscopically, glass and stainless steel surfaces have hills and valleys that trap sea salt and dirt deposits. Over time these deposits can cause staining and etching, making cleaning progressively more frequent and difficult.

Reduce cleaning time by up to 90%

- Available in a D.I.Y kit or by professional application
- 10 Year warranty on new glass (professional application)
- 3 Year warranty on existing glass

Ultra long lasting performance

"I used to spend hours cleaning my boat. Now that I've had EnduroShield applied, cleaning is a breeze. Just a simple rinse and wipe down and the job is done – it's easy."

- Mark Hillbrick, Halls Head.

GLASS:

ENDUROSHIELD FOR GLASS

EnduroShield For Glass is a revolutionary, invisible coating that completely adheres to the glass and provides permanent protection that will repel water and oil based stains. Similar to a non-stick fry pan, cleaning is made easier using only a damp microfibre cloth and a mild detergent. No longer is scrubbing with aggressive cleaners necessary.

Improved Vision For Glass

EnduroShield® uses state-of-the-art nanotechnology to transform glass into a high performance, ultra-long lasting water repellent surface. This non-stick invisible coating turns the water into beads, ensuring dramatically clearer vision in wet weather conditions.

STAINLESS STEEL:

ENDUROSHIELD FOR STAINLESS STEEL

EnduroShield for Stainless Steel is a non-stick protective coating that seals the surface, making cleaning and maintenance easier. EnduroShield® is completely invisible and does not change or alter the appearance of the surface. EnduroShield® provides both hydrophobic and oleophobic protection, reducing both corrosion and tea staining that can form as a result of constant exposure to saltwater environments.

Many acidic cleaners that are used to treat corrosion that develops on stainless steel can accelerate and increase the return rate. EnduroShield® will eliminate the need to use those cleaners, and dramatically slow the corrosion process.

Protect against corrosion & etching

Stainless steel D.I.Y. kit available
